Thanks, Chad. Those are welcomed refinements. All are accepted.

I will now send this around internally.

Cheers.

Paul

Paul et al,

Have attempted to add clarity to the remote-sensing task. What we are proposing is a broad summary comparison, based on remotely sense information, that will subsequently be expanded with on-the-ground sampling. Could add this comparative element as a specific call-out in Task 4 (CEQA/NEPA), as it's a requirement...

Subject: DWR draft write up of possible scope of work

Hi: here is the revised scope for the possible discussion we will have with DWR on using CWMW-approved monitoring and mapping approaches for both the CV Flood Management Planning Program and the BDCP. I have included Erin Foresman from our office to see if she can give us some additional feedback on the proposal.

Next, I will take it to our associate director in the Office of Water, Karen Schwinn, for her consideration. If it makes it past that, we can then talk to Dale Hoffman-Floerke about it - which Eric and I will set up.

Sound OK?

Still haven't heard if Ross Clark is going to be listed as a possible partner.

Cheers,  
Paul
